Technical Support Engineer with experience supporting API driven SaaS platforms at scale. Strong background in complex integration debugging, cross-functional collaboration, internal tooling development & ownership of high impact outcomes.

EXPERIENCE

Intercom

Dublin, Ireland

Technical Support Engineer

Mar 2025 – Present

- Deliver **advanced technical support** to global customers, As well as acting as a **subject matter expert for Intercom integrations**, advising internal teams on system behaviour, limitations & best practices.
- Troubleshoot **complex end-to-end integrations** across **APIs, SDKs & webhooks**, identifying **root causes across multiple systems** & platforms. Investigate **data inconsistencies & integration failures** using **logs, API responses & metrics**, restoring system integrity & helping prevent recurrence.
- Partner with **Product & Engineering on complex escalations**, providing **clear reproduction steps, root cause analysis & technical context** to accelerate resolution.
- Own **high impact issues end-to-end**, maintaining proactive stakeholder communication & consistently driving **customer satisfaction above 91%**.
- Collaborate with **Customer Success Managers & Account Executives on pre & post sales calls** to **design solution approaches**, unblock integrations & provide **technical guidance or workarounds** during critical conversations.
- Built an **internal MCP server & workflow automation** to streamline bug & internal ticket escalation to Engineering, **reducing average triage time by 70%** & improving the **consistency & quality of escalations**.
- Led investigations into **recurring integration issues**, contributing to **improved system reliability** & a **reduction in repeat incidents**.

Telnyx

Dublin, Ireland

Product Support Engineer

Mar 2022 – Aug 2024

- **Resolved 91.7% of client reported issues** within **SLA timelines**, ensuring **high customer satisfaction** in 2023.
- **Debugged complex API** & system integration issues between Telnyx services & customer platforms.
- **Utilized Wireshark & data analysis tools** to diagnose **network issues**, reducing **issue recurrence by 20%**.
- **Partnered with cross-functional teams** (engineering, sales & product teams) to identify recurring integration failures & contributed to long term platform stability improvements.
